DETER PARQUET

code SO9050

TECHNICAL DATA (based on room temperature of +23°C and 65% of relative humidity)

Appearance	jellow liquide
Viscosity	17" ±3 Ford cup 4
pH	13 ±1
Specific weight	1.00 ±0.01
Average yield of the diluted product	15-20 sq. m/litre

DESCRIPTION

Highly concentrated detergent for the ordinary cleaning of sealed wood floors and the extraordinary cleaning of oiled wood floors. DETER PARQUET is easily dilutable in water and suitable for domestic as well as for professional use.

PACKAGING

1-litre plastic bottles in 12-piece-cartons.

DIRECTIONS

Use the cap of the bottle to dose the product: 1 capful DETER PARQUET to 1 litre water.

Wipe the floor with a cloth or a mop moistened with the solution. If necessary, rinse the cloth or mop every now and then in clear water to remove dirt, then wring it out and soak it in the solution again.

Sealed wood floors

After drying, the floor should be waxed with our product BEL PARQUET. The combined use of DETER PARQUET and BEL PARQUET is essential for the extraordinary maintenance.

Oiled wood floors

After drying, treat the floor with Carver APILUX beeswax emulsion or CARSOL maintenance oil (in this case wait at least 24 hours after cleaning).

NOTICE

- DETER PARQUET is dilutable only in water.
- The contained surface-active agents are over 90% biodegradable.
- Be careful! When cleaning a wood floor never flood it with the detergent solution, but wipe it with a damp cloth or mop.

Protect from freezing!

If the original unopened container is stored in a cool, dry place, the product will keep for at least 12 months.

The information contained in this technical datasheet is to the best of our knowledge and experience. Since the conditions of use are beyond our control, no warranty is given or implied.
